

IBRAHIM YOUSSEUF ABDELATIF

JUNIOR DATA SCIENTIST

Internship at BNP Paribas – Data Office Europe Mediterranean | April – September 2026

+33 7 51 51 24 31 | ibrahim-yousseuf.abdelatif@dauphine.eu | Paris, France | [LinkedIn](#) | [GitHub](#)

PROFILE

Master 2 student in Statistical & Financial Engineering (Data Science Track) at **Paris Dauphine – PSL**. Currently completing a 6-month internship at **BNP Paribas** (Data Office, Europe Mediterranean), focused on Agentic AI experimentation and LLM-based solution development. Proven track record in end-to-end ML projects and stakeholder-facing data science, with prior experience at **Deloitte**. Trilingual in French, Arabic, and English.

EDUCATION

- Paris Dauphine University – PSL

Master 2, Statistical & Financial Engineering – Data Science Track

– **Core Courses:** Generative AI for Business, Deep Learning, NLP, Reinforcement Learning, Learning Theory, Data Quality, Cybersecurity.

Paris Dauphine University – PSL

Master 1, Applied Mathematics – Statistics Major

– **Core Courses:** Statistical Learning, Generalized Linear Models, Stochastic Processes, Portfolio Management, Jump Process.

University of Strasbourg

Bachelor’s Degree, Applied Mathematics

– Ranked **Top 2%** of cohort. Rigorous training in scientific computing, mathematical modeling, and statistical inference.
- Sept. 2025 – Present

Paris, France

Sept. 2024 – June 2025

Paris, France

Sept. 2021 – June 2024

Strasbourg, France

PROFESSIONAL EXPERIENCE

- BNP Paribas – Data Office, Europe Mediterranean

Agentic AI Data Scientist Intern

– **Agentic AI Experimentation:** Developing Agentic AI solutions across the Europe Mediterranean region (Poland, Ukraine, Turkey, Algeria), evaluating **Dataiku** and the group’s LLMAaaS infrastructure for reliability, performance, and business fit.

– **End-to-End Project Management:** Framing use cases from feasibility through deployment, engaging Business, IT, and external partners to ensure data availability, privacy compliance, and model performance evaluation.

– **LLM Development:** Building agent-based solutions on BNP Paribas’s internal LLM platform, orchestrating pipelines that translate business processes into automated, AI-driven workflows.

Deloitte Chad

Data Scientist Intern

– **Forecasting:** Engineered time-series models (ARIMA, Prophet) for 2026 national budget projections; **reduced MAPE by 12%** over the legacy approach, directly informing strategic financial planning decisions.

– **Stakeholder Collaboration:** Conducted requirements-gathering sessions with financial and IT teams to translate business needs into precise analytical specifications, ensuring interpretable, decision-ready outputs.

– **Automation:** Deployed dynamic Power BI dashboards consolidating multi-source data, **cutting manual processing time by 14%** and enabling real-time monitoring for senior management.

Paris Dauphine University – PSL

Junior Researcher – Non-Linear Dimensionality Reduction

– **Research:** Comparative study of Linear PCA and Kernel PCA on high-dimensional datasets; thesis defended before a jury, awarded **Highest Honors**.

– **Analysis:** Implemented and benchmarked manifold learning algorithms in Python (scikit-learn, NumPy), producing reproducible evaluation pipelines and visualization outputs.
- April 2026 – Sept. 2026

Paris, France

June 2025 – Sept. 2025

N’Djamena, Chad

Oct. 2024 – May 2025

Paris, France

DATA SCIENCE PROJECTS

- Agentic AI Assistant – RAG Architecture & LLM Orchestration (Natixis Hackathon)

Python, LangChain, OpenAI API, FAISS, Prompt Engineering

• **Agentic Architecture:** Designed a **RAG** agent connecting an LLM to a proprietary knowledge base via tool-calling and memory, enabling context-grounded autonomous responses over confidential documents.

• **Platform Evaluation:** Benchmarked across multiple LLM providers and retrieval configurations for latency, reliability, and output quality; presented prototype to a jury of business and technical stakeholders.

Credit Risk: Challenger Model & Explainable AI

Python, XGBoost, SHAP, Scikit-learn, Seaborn, Pandas

– **Modeling:** Developed an XGBoost challenger model contesting an existing credit scoring system; demonstrated measurable gain in risk discrimination via comparative density plots and ROC analysis.

– **Explainability & Impact:** Applied **SHAP** to produce feature-level explanations aligned with regulatory requirements; built transition matrices identifying high-value segments underscored by the legacy model.

Customer Segmentation & Interactive Decision Dashboard

R, K-Means, DBSCAN, R Shiny

– **Clustering & Deployment:** Profiled behavioral segments across 2,200 clients using K-Means and DBSCAN (silhouette-validated); delivered an **R Shiny** web app enabling the marketing team to explore segments interactively and export insights.
- April 2026

2025

Nov. 2025

TECHNICAL SKILLS

Languages & Libraries: Python (Pandas, NumPy, Scikit-learn, XGBoost, PyTorch, TensorFlow, **LangChain**), R, SQL.
Agentic AI & GenAI: RAG pipelines, LLM Orchestration (OpenAI API, LangChain Agents), Prompt Engineering, FAISS, Hugging Face Transformers, **Dataiku**.
MLOps & Big Data: PySpark, **Azure**, Docker, MLflow, Databricks, Git.
Visualization & Reporting: Power BI, Matplotlib, Seaborn, R Shiny.
LANGUAGES, SOFT SKILLS & INTERESTS

Languages: French & Arabic (Native), **English (C1 – Fluent)**.
Soft Skills: End-to-End Project Management, Stakeholder Communication, Analytical Thinking, Cross-Cultural Adaptability, Initiative.
Interests: Agentic AI & LLM Research (Papers With Code), Geopolitics, Traveling (USA, UAE, Turkey).
